SUMMARY

Second-year CS undergraduate at DTU building production-grade AI systems — agentic LLM pipelines, serverless deployments, and fine-tuned NLP models. Delivered measurable impact across automation, blockchain, and computer vision; seeking AI/ML engineering or product development roles.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, JavaScript, HTML

AI / ML: Machine Learning, NLP, Transformers, LangChain, Langgraph, Gen-AI, Hugging Face, RAG, VectorDB, OpenCLAW, Claude

Frameworks & Tools: FastAPI, REST APIs Streamlit, Playwright, Selenium, Web Scraping, Firecrawl, Next.js

Cloud & Infra: AWS Lambda, Apps Script, OpenRouter, GCP Docker, CI/CD Pipelines

EXPERIENCE

RevopsAgent

Jun 2025 – Sep 2025

AI & Automation Intern

Remote

- Built an AI tools intelligence platform using Playwright + Selenium, reducing manual discovery time by **70%** and indexing **200+** tools.
- Developed hiring automation (Python + Apps Script + OpenRouter) cutting recruiter workflow time by **60%**, adopted by **3+** clients.
- Scaled LLM pipelines handling **1,000+** daily API calls, improving throughput by **40%**.
- Deployed 4 AWS Lambda microservices achieving **99.5% uptime** and reducing infra cost by **35%**.

Exora

Oct 2025 – Present

Co-Founder

Delhi & Goa

- Building a social travel platform for community-driven experiences; leading backend systems and mobile architecture (Flutter).
- Developed scalable APIs for discovery, onboarding, and host management; accelerated MVP with a Flutter intern.
- Achieved **200K+** impressions and **500+** waitlist users within the first week through organic growth.
- Executed **15+** events (30–40 attendees) across Delhi and Goa, validating demand with break-even economics.
- Bootstrapped via consulting (**2L+** revenue) to extend runway and iterate on product.

National Youth Council Singapore

2024

Technology Apprentice

Singapore (Remote)

- Completed a structured AI/computer vision curriculum under industry mentors from Buzz AR and Mercurius, delivering 2 project prototypes covering object detection and cybersecurity threat modeling.

PROJECTS

Agentic Arbitrage Engine — Stellar Blockchain | LangChain, Soroban | 2nd Prize, 0xGenIgnite Hackathon

- Built an autonomous arbitrage agent using Soroban + Horizon API detecting multi-hop DEX opportunities, reducing simulated price fragmentation by **85%**.
- Developed a Next.js dashboard simulation tracking **50+** liquidity pools with sub-second latency.

Product Review Sentiment Analyzer | BERT, Hugging Face Transformers, Streamlit

- Fine-tuned BERT on **50K reviews**, achieving **91% accuracy** — **+7 pts** over TF-IDF baseline.
- Built a Streamlit app handling **100K-row CSVs** with real-time predictions and exportable analytics.

AI-Driven Procurement Audit & Supplier Intelligence | Python, ML, FastAPI

- Built an ML-assisted compliance engine that analyzed **500+** supplier bids, flagging **23% anomaly rate** and generating automated scoring reports — reducing manual audit time by an estimated **50%**.

AI-Powered Lead Enrichment Agent | Firecrawl, Gemini 2.0 Flash, Python

- Automated B2B lead research by chaining Firecrawl content extraction with Gemini 2.0 Flash summarization, cutting per-lead research time from **15 min to under 90 seconds** (10× speedup).

EDUCATION

Delhi Technological University

B.Tech in Computer Science

Delhi, India

2024 – 2028
